Description

Our Giovanni's Italian Cheese range is made using only the finest cheeses sourced from a close circle of expert cheese makers, our Mozzarella is 100% pure and can also be pre mixed with our expert sourced cheddar cheese.

The range works for a wide variety of uses, such as cooking, pizza's and accompaniments to a meal.

Our expert graders work closely with a small selection of producers that are handpicked to ensure that they meet our exacting requirements in order to bare the *Giovanni's* seal. This is how we ensure that our customers only ever receive the perfect product for their needs.

Once the Cheese has been sourced, it is brought to our state of the art site where our master craftsman further process it into its finished format whether that be grated, cut or sliced.

Giovanni's has a wide reach with customers ranging from foodservice, manufacturing and restaurants.
