## ENVIRONMENTAL STATEMENT

The need for environmental protection forms an integral part of business philosophy. The fact that our activities or those of our employees may have an effect on the environment is of great consequence to us. The Nantwich Cheese Company Ltd endeavours to operate in harmony with the environment, with particular emphasis on the following areas:

- To utilise materials and processes which make minimum demands on the environment and which produce minimum waste.
- To conduct our service using environmentally friendly materials and equipment which are energy efficient and produce minimal harmful waste when disposed of.
- To minimise the waste produced through the business activities and look for innovative ways to recycle waste material.
- To reduce the demand on energy resources from our activities.
- To utilise, where applicable, efficient distribution and transport systems for goods and personnel.
- To provide all the information necessary to enable products to be properly used, stored and disposed of so as to avoid damage to the environment.
- To ensure that all employees are in a position to improve environmental performance by providing appropriate information, training and consultation procedures.

None of the above can be achieved without the full cooperation of all employees and consequently it is important that everyone understands the vital role they have to play in meeting the above policy.
